

Introduction to IRT Using R (2PL)

Wan Nor Arifin

2017-07-19

Introduction

Our focus is on 2PL model only. The formula is given as:

$$P(\theta) = \frac{1}{1 + e^{-a(\theta-b)}}$$

1PL (Rasch), 3PL & 4PL have to learn on your own.

A short introduction and comparison between item analysis and item response theory analysis is presented by Arifin and Yusoff (in press).

Preliminary readings

- “The Basics of Item Response Theory” @ <http://echo.edres.org:8080/irt/baker/final.pdf>
- “Applying item response theory (IRT) modeling to questionnaire development, evaluation, and refinement” @ [https://www.researchgate.net/profile/Maria_Edelen/publication/6432794_Applying_item_response_theory_\(IRT\)_modeling_to_questionnaire_development_evaluation_and_refinement/links/09e415092a186a0ccb000000.pdf](https://www.researchgate.net/profile/Maria_Edelen/publication/6432794_Applying_item_response_theory_(IRT)_modeling_to_questionnaire_development_evaluation_and_refinement/links/09e415092a186a0ccb000000.pdf)

Important cutoff values

Discrimination:

- De Ayala (2008, pg. 101): Good .8 to 2.5
- Baker (2001, pg. 35): 0: None, .01 to .34: Very low, .35 to .64: Low, .65 to 1.34: Moderate, 1.35 to 1.69: High, > 1.70: Very high, + infinity: Perfect
- Hambleton (1991, pg. 15): Usual range 0 to 2

Difficulty:

- De Ayala (2008, pg. 15): Theoretical range -inf to + inf; typical range -3 to +3; < -2.0: Easy, -2.0 to 2.0: Average, > 2.0: Hard
- Hambleton (1991, pg. 13): -2 (very easy) to +2 (very difficult)
- Baker (2001, pg. 32-33): Theoretical range -4 to +4, typical range -3 to +3, usual range -2.8 to + 2.8

*Practical session**Install packages*

```
install.packages(c("psych", "ltm", "irtoys", "mirt", "latticeExtra"))
```

Load required libraries

```
library("psych")
library("ltm")
library("irtoys")
library("mirt")
library("latticeExtra")
```

Load data

Read data set “mtf.csv” into “data.mtf” data frame

```
data.mtf = read.csv("mtf.csv", header = TRUE) # Includes headers
head(data.mtf) # View first 6 students in the data set
```

```
